Dear Sirs

UFO REPORT RECEIVED BY EDINBURGH AIRPORT ON 19 MAY 1988 at  
1100HRS

- A 19 May 1988 at 0003.
- B Numbers of Bright Orange lights, maximum 3.  
Size and shape not given.
- C At home address.
- D Naked eye and binoculars.
- E South of observer, beyond Cramond Island but West of  
Ski Slopes.
- F Approximately 20 degrees but definitely above Pentland  
Hills.
- G Unable to estimate.
- H Movement was in vertical plane both ascending and  
descending with slight easterly drift.
- J Good visibility and no low cloud.

K Objects were beyond south bank of River Forth,  
therefore observer's view was over open water.

L 'Dunfermline Press' newspaper.

M Section 40 Fife.

N Nothing given.

O Section 40 at same address.

P 19 May 1988 at 1100 hours.

In addition Edinburgh Airport ATC Watch log records that at 2300Z a Police Mobile patrol unit reported seeing 1 static white light and 4 occulting yellow lights in the sky in the vicinity of the Ski Slopes but above the Pentland Hills.

## MINUTE SHEET

Subject

Station: HuddersfieldDate: 23rd APR. '88

THE DIVISIONAL OFFICER

ALLEGED  
U.F.O.  
SIGHTING  
EDS ROAD.

SIR: At 9.30 p.m. on the afternoon of Thursday the 21st of April 1988 I attended at Section 40

Section 40 Huddersfield regarding an alleged sighting of an unidentified flying object, by Section 40

A full statement outlining the details of the sighting was taken from the informant and is attached hereto.

According to the informant the following people also witnessed the same object:

1/ wife Section 40

2/ Son Section 40

3/ Daughter Section 40

all of Section 40

4/ Section 40

Huddersfield

Section 40 describes himself as a 'seasoned' cosmologist and has recorded sightings earlier. He also has access to radio receiving equipment and apparently monitors aircraft V.H.F. transmissions.

The informant has previous military service having served in the R.A.F. 1954-58. He states that he was a corporal and ~~saw~~ served with aircraft crash rescue. During his R.A.F. service he says that he saw U.F.O's on Salisbury Plain.

The object was seen somewhere above the I.C.I. chemical works

in Huddersfield. The complex lies near the main Leeds Road from Huddersfield which itself is located in the valley of the River Colne, which runs in a north easterly direction from the town centre. The east side of its valley rises steeply from the valley floor to height of about 200' above it. The valley side lies immediately to the near of the chemical complex. Within the confines of this locality are 4 gantries which hold the floodlighting for the adjacent Huddersfield town football ground and electricity transmission lines traverse the area both on the valley floor and its sides.

I request that this report and the accompanying statements be forwarded to The General Administration Department at Force Control for disposal to M.O.D. Duty Controller Aeronautical Information Services (Military) R.A.F. West Drayton.

AGE/Date of Birth: Section 40 OCCUPATION: Section 40 Bo.RB  
ADDRESS: Section 40

This statement (consisting of Four. pages signed by me) is true to the best of my knowledge and belief and I make it knowing that, if it is tendered in evidence, I shall be liable to prosecution if I have stated in it anything which I know to be false or do not believe to be true.

Dated the 21st day of APRIL 1988

I am Section 40 and

I live at the above address with my wife, daughter and son.

At 8.55 p.m on the evening of Wednesday the 20th of April 1988 I was in the front sitting room of the above address with my wife Section 40 and my daughter Section 40

At this time my daughter said to me "Come her dad! look at this; I think it is one of your UFOs" I immediately got up from my seat and went to the ground floor front window of the house, which over looks Section 40 Bradley Mills and the escarpment which is Rawthorpe.

As soon as I looked out of the window I saw about a mile in the distance and at a bearing of ~~SS~~ south south west an object in the sky at an altitude which I would estimate to be 2000'. This object I can describe as being a stationary rectangle containing five lights from which was emanating a very intense white light. The five lights were positioned horizontally and the two on the extreme right hand side of the object appeared to be pivoting upwards and downwards. I would estimate its size to be comparable

with that of a medium sized passenger aircraft

After first sighting this object I immediately went and got my binoculars which I always keep next to the chair. I then went out of the front door and took a position up about halfway down the garden path.

I was now able to use the binoculars to gain a more detailed view of object. I could now see that it was in fact a wedge shape with the thicker end towards Huddersfield town centre and tapering to a point which was facing towards the I.C.I. chemical works on Heeds Road. The white lights which I had seen earlier had now apparently changed position. Their positioning now was as follows two on the underside at the pointed end and one light above. Immediately behind the two underneath lights were 3 red lights which I could describe as being of high intensity and possibly of a fluorescent type. These were smaller than the white lights but I would say that they larger than an aircrafts navigation lights. Further behind these 3 red lights was another white light and a fifth white light was located on the upper side of the wedge approximately mid-way along its length. I was also able to gain some idea of its colour and would describe it as being a shiny blue/grey metal colour.

As I watched the object, ~~move~~, I

saw that it began to move in an easterly direction towards the I.C.I. complex. After about a period of a minute and a half the object had reached the complex I stood and watched this with both my wife and daughter, the object appeared to move very slowly but smoothly over the half mile which is the distance from its original position and the I.C.I. complex. The object also maintained its altitude and at no time did I hear any engine or other noise coming from it.

\* I then came back into the front sitting room and watched this object from my sitting window. I was now looking in a south-easterly direction. } Section 40

My wife and daughter now returned to the sitting room but I remained outside and kept the object in view. The object now veered towards the south-east and its speed increased. It headed off in at a steady speed towards Cooper Bridge and appeared to me to be following the electricity transmission lines. As I watched the object seemed to fade away into the distance until eventually lost sight of it.

I would say that the duration of the sighting was between five and seven minutes. The weather conditions were high altitude but patchy layered cloud. There was no rain and wind conditions at ground level were calm. It was dusk although

## MINUTE SHEET

Subject

Station: Dewsbury Date: 13th April 1988

UFO SIGHTING.

Sub Divisional Officer, Dewsbury.

A report was received from Section 40 aged 17 years regarding the sighting of an unidentified flying object at 3.15 a.m. on Tuesday 12th April 1988.

The informant who suffers from Section 40 was unable to sleep and was spending the night on the sofa in the lounge of her home. At 3.15 a.m. the family dog became agitated and began barking. A sound could be heard which she described as being like a railway locomotive only yards away. The nearest railway line running from Huddersfield to Wakefield is approximately 1 mile away. There were no vehicles in sight outside the house which is in a small quiet cul-de-sac.

On looking through the lounge window the informant saw an object in the sky some distance away, probably between the Rectory Park and Combs Road area. She could not describe a shape but saw that it displayed a round red and a round white light, similar to those displayed by aircraft. The object was observed for several minutes and did not move. Her angle of sight from the lounge window was between 30 and 40 degrees. Stars could clearly be seen as the sky was clear.

When the informant closed the curtains after several minutes the lights were still visible and had not moved, the sound was still continuing. She was sure that the sound was with the lights. The sound continued for at least 30 minutes before she fell asleep.

The object was observed from indoors and by the naked eye only. There are no large buildings nearby but other dwellings are on higher levels than the informants home.

Section 40 was the only person to see the object but next door neighbour Section 40 of Section 40 heard what she described as a humming noise above the houses at 3.15 a.m. the same morning. She was awoken by the noise but on looking outside could see nothing. She will verify that the noise continued for some 15 or more minutes, and could clearly be heard indoors, Section 40 works for the Section 40 but has made no mention of the incident at work.

Section 40 has made no mention to the press. She has not had any involvement with any of the armed services or with any UFO agency. She did however ring Leeds/Bradford Airport and was told that a similar report had been received from Leeds that morning.

Dated the 26th day of March 1988

STATEMENT OF WITNESS

C.J. Act, 1967, s 9,  
M.C. Act, 1980, s 102,  
M.C. Rules, 1981, r 70)

I am Section 40 of the above address. I work as a taxi driver for Section 40 who are based at Section 40 Hemsworth.

At 11.50 pm on Thursday 24th of March 1988 I was driving a taxi on the Brierley Road towards Great Houghton on the way to pick up a fair at Middlecliffe. Section 40

I was about 3/4 of a mile out of Great Houghton travelling at about 25 miles per hour as I was in no rush. As I looked in my wing mirror a bright light caught my eye off to my right. As I looked up to my right I noticed a very bright white-green light. At first I thought it was an airplane in trouble as it looked to be very low in the sky and I noticed two red lights to the side of the big light. I then slowed down to gain a better view of it at this point I could see a vague outline and more lights became visible.

At this point the lights had crossed enough curiosity for me to stop the car and wind down my window to gain a better view. I turned off the engine and switched off my lights by this time it was virtually level with me so I got out of the car at this point I'd say what I saw was about 800 yards away from me travelling in the direction of Thorescoe, South Yorkshire. As I watched the craft pass me I made a diagram on a piece of scrap note paper I had with me.

Statement taken by:

Section 40

Section 40

STATEMENT OF: **Section 40**  
Continued:

The craft was a silver green metallic colour and was in my sight for about 10 minutes before fading away. The sky was clear with a slight breeze. I could hear a very slight low toned humming sound which faded as the craft passed over me.

The next day on Friday 25th of March 1988 I was back at taxi base on Lawfield Crescent Harewood. At about 8.50 pm that night I went out to my car to pick up a fare.

As I went out the car the same bright white green light caught my eye again. I looked up and watched it for about 2 or 3 minutes as it grew larger.

At this point I went inside the house and got my aunt, **Section 40** out to look at what had been seen. About 2 minutes later she came outside and saw about 1/4 of a mile away a form of elongated spinning top about the size of 3 times the size of a hot air balloon at this point my aunt ran back inside the house and I observed it for a further 10 minutes before again it faded away over towards South Mearnsby. Again the night was cold, there was nothing obstructing my view of what I saw. I have not seen anything since and I watched until about 2 o'clock am today.

**Section 40**

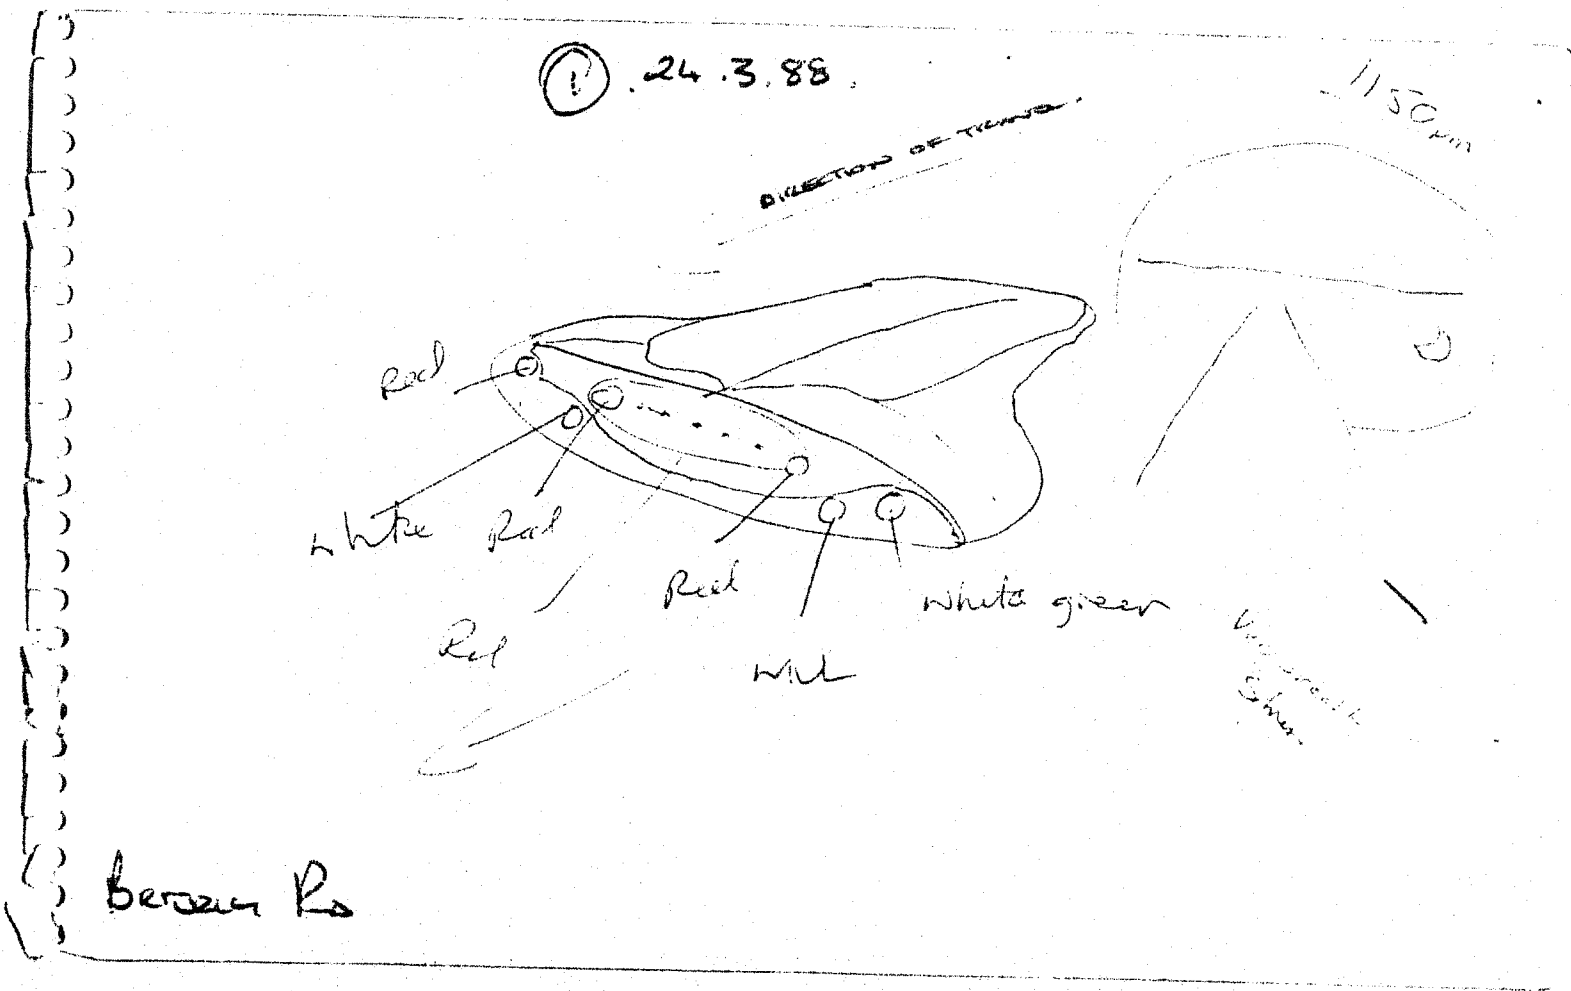

STATEMENT OF: **Section 40**  
**Section 40** Continued:

to 8 minutes, during which time the object did not move and was not obstructed in any way. It is very difficult to estimate the size of the object, but I would say that the part of it I saw was very big.

I have never seen anything like the object before or since and at the time of the incident I was very frightened. I can also say that I have no interest in any such matters and do not belong to any clubs or organisations which do.

REPORTS OF UNIDENTIFIED FLYING OBJECT (UFO) - 30 MAR 88

1. The enclosed report refers to the sighting by **Section 40** of a UFO on 30 Mar 88 at Bircotes, near Doncaster.
2. You may wish to know that I have been approached by a local newspaper, The Rotherham Advertiser, who have received 3 other reports appearing to refer to the same incident. All 3 sightings made to the newspaper occurred on 30 Mar 88 between 0530 and 0535. The reports were as follows:
  - a. **Section 40** reported seeing a large, white light travelling very fast at 0530 at Brecks, near Rotherham.
  - b. **Section 40** reported seeing a white light the size of a football which landed outside his house at **Section 40** near Maltby at 0535. The object fizzled away on impact with the ground and left no mark or debris.
  - c. **Section 40**, reported seeing a UFO at 0530 over Rotherham whilst she was travelling to work.
3. In addition, the Daily Mirror newspaper contacted me on 5 Apr 88 in connection with recent UFO sightings in this area. The reporter, **Section 40** believed the sightings to be connected with unusual weather patterns in this area.

## MINUTE SHEET

Subject:

Station: Bradford Central Date: 19 February 1988

FO SIGHTING

Sub Divisional Officer, Bradford Central

At 1930 hours on Thursday, 18 February 1988 I was off duty with my wife and 8 year old daughter. We were travelling in my vehicle along Toller Lane, Bradford towards Bingley.

When approximately at the junction with Leylands Lane, my daughter remarked that she could see a star that was moving. My wife looked at the object and said that it looked like a line of shining white lights and was going in the same direction as ourselves. I leant across the car and saw the object myself. It appeared to be fairly high in the sky. I could see a line of white lights travelling at the usual speed of an aeroplane.

My family requested that I stop to look more closely and I decided to stop in Thorne Lane off Bingley Road. This road overlooks the whole area and judging by the speed of the object I thought I would get there before it did.

However, as I passed the junction with Haworth Road, my wife who had watched the object continually, remarked that it suddenly turned left and accelerated quickly away.

When I stopped in Thorne Lane some seconds later the object was nowhere in sight.

During the period whilst it was in sight I glanced at it on three occasions. It was the size of a small passenger plane and it was difficult to judge its shape. The line of lights suggested it was long and thin.

I could hear no noise over the car noise. It was observed with the naked eye and no photographs were taken.

The weather was dry and windy, there were a few clouds in the sky that were moving quite fast with the wind. The object flew over a housing estate the only large buildings would be the Bradford Royal Infirmary and Sharpe's Printers.

On first seeing the object it could have been an aeroplane even though we could not see any coloured lights but when the object changed direction suddenly and accelerated we were sure it was not.

I have attached a map showing where my vehicle travelled during the sighting. The dotted line is the approximate route taken by the object.

Submitted for the information of General Administration at Headquarters.

# INTEREST

1 **AA Service Centre** (B3)  
**Cathedral** formerly (C3)  
 the Parish Church, it is mainly 15th-century, notably the Boling Chapel. The Cathedral was considerably enlarged in 1951-63 and there is good, modern woodwork inside, as well as stained glass by William Morris in the Lady Chapel. The 15th-century font cover is very beautiful.

2 **Central Library, Theatre and Towns' Information Centre** (B2)  
 3 **City Hall** Date: (B/C2)  
 from 1873. The 200ft tower is styled on the campanile of the Palazzo Vecchio in Florence and contains a thirteen bell-chamber.

4 **Exchange** Opened in (C3) 1867, the Wool Exchange is a reminder of Bradford's importance in the wool trade. The clock tower is 150ft high and beneath it are statues of Bishop Blaise and Edward IV as well as portraits of Gladstone, Palmerston and Arkwright. The interior is decorated with polished pink granite columns.  
 5 **St George's Hall One** (C2) of the main centres of northern musical tradition. Today the setting for great orchestral and choral works.
