Ext **Section 40** work.

She told me that she believed she had seen what she believed to be an Unidentified Flying Object, a bright light in the sky which she felt was abnormal and not within her previous experience.

I obtained details from her and notified Force Control, who informed me that a report should be forwarded to General Admin. Dept. Force H.Q. Wakefield. for onward transmission to R.A.F. etc.

They also requested a C.J.Act statement from **Section 40**

I obtained a statement which is attached.

I request that this report be forwarded to the above department for their information and action.

Section 40

STATEMENT OF WITNESS

(C.J. Act, 1967, s 9, M.C. Act, 1980, s 102, M.C. Rules, 1981, r 70)

At 5.35 pm on Thursday 8th December 1988 I was driving my Talbot Samba motor car reg. no. Section 40 along the M621 motorway. I was on the eastbound carriageway driving from the direction of the M62 towards Leeds. I was at the junction before the A58. I could see clearly through my windscreen right over Leeds. As I looked over Leeds I saw a very bright light in the sky, it appeared to be over the city centre area. The light had a pinkish blue tinge to it, very similar to an ultra violet light, it flashed on and off approximately five times. There were no other lights near to or with the white light. I continued to drive along the road and the light, which originally had been moving from right to left, appeared to turn and move along the side of me until it was behind my car. The light was at a height which I would say was the same as aircraft which I have previously seen in the area. I have never seen a light like this before. I would say that I saw the light for a period of approximately one minute. Section 40 My first thought that it was an aeroplane but the speed it moved at and the quick change of direction made me feel that it was not. About four minutes later, I saw an aeroplane but the light on this was much smaller and had a red flashing light with it. I did not hear any noise from what I saw, but I was driving at the time and this would prevent me from hearing any sounds outside the car. The

Dear Sir,

I wish to report something I saw
last night, out of interest. Perhaps you
may have an idea of what it was.

Sighting

TIME : 6.20 pm (FULLY DARK)

DATE : Nov. 14. 88

PLACE : At the foot of PEN DINAS, ABERYSTWYTH, WALES
(OS. 1" Map Ref:)

HEIGHT : Seemed about 1000' but very difficult
to determine where exactly in space
it was.

I was facing SSW and it was moving
in a westerly direction, out to sea
(Cardigan Bay).

It suddenly appeared and after a few
seconds (30 secs. approx.) disappeared equally
quickly.

It travelled absolutely horizontally and

very fast. It seemed close and quite large.

~~Unwrapped.~~

Its shape was long and thin, like a rocket and was very bright yellow, glowing and solid.

Behind the main 'body' was a strip of round shapes - like beads. They were red and yellow.

The whole length fitted into an arc of my vision of about 70° .

The speed of it blurred the light together so it was difficult to determine the form of the tail, except that the 'beads' were smaller progressively.

I learned today that a Russian space-craft came down last night - albeit over Russia. Was this what I saw?

Yours sincerely

AFOR have been taking reports from every night this week. Her reports vary from sightings of stationary object, to high-speed movements with and without noise. AFDO believes see is fairly sensible and has asked that we contact her to assure her that we will be looking into her reports and responding. She will be away from lunchtime today - is it possible to talk to her this morning to pass re-assurance. Telno as per reports. Be speak if this is a problem.

SUBJECT: Sighting of Unidentified Flying Object

1. I report with reference to the attached teleprinter message with regard to the action to be taken following reported sightings of unidentified flying objects.
2. At 2120hrs. on Wednesday, 31st August, 1988 Section 40 who both resides and works as a farmer at Section 40 Nr. Lichfield, was working in a field at the farm when he observed what he described as the following:-
3. Either three or four bright white lights which were close together and remained on. The lights were observed coming from the direction of Hopwas Woods and when almost overhead of the observer, stopped and remained stationary, momentarily, at an estimated height of 400 feet. The lights then moved away towards the direction of Botany Bay, Whittington, which is located on the A51 trunk road linking Lichfield and Tamworth.
4. Section 40 described the object upon which the lights were carried as flat and possibly rounded, of a very bright colour. It made no noise and there was no apparent odour. The object was described as being larger than a helicopter.
5. Approximately ten minutes following this sighting, Section 40 saw what he described as a set of red and white flashing lights approaching from the same direction as outlined in respect of the first object. These lights approached and went overhead of the observer, moving away in the same direction as previously stated. The observer is unable to give any indication as to either size or shape of the object on which the lights were carried. He states that no noise or odour was apparent and that the object was flying higher than that of his first sighting. The second set of lights moved at a faster pace than the first. Section 40 observed the sightings with naked eyes.
6. The objects were first sighted approximately three quarters of a mile away from the observer at a point over Hopwas Woods, near to the television mast located near to the A51 at Packington.
7. The objects were described as moving towards, overhead and away from the observer at one height and in a straight line.
8. In respect of the prevailing meteorological conditions, it was a fine, clear evening, with no cloud or haze.
9. The following objects are located in the close proximity of the sighting:- (a) Television mast. (b) High voltage overhead railway cables. (c) Telephone lines. (d) River Tame.
