Identified Flying Object

Mrs. [REDACTED]
[REDACTED] 34
Los Lunas, NM

Reference your letter of 10 May 1967, on your sighting of an unidentified flying object.

Investigation revealed that one of our Air Force helicopters was flying in the same area and at the same time you mentioned in your letter. The pilot stated he was operating his high-powered search lights at the time and the atmosphere contained a large amount of dust and blowing sand.

I would like to thank you for your interest and if you have any further questions, please feel free to contact me at Kirtland AFB; Telephone 247-1711, Extension 3061.

CHU

CHARLES H. VAN DIVER, Capt, USAF
Chief of Safety

Valencia, N. Mex.
May 10, 1967.

Air Police Operations
Kutland AFBSE, Albuq.

Attention someone:

I don't know who to contact but
I would like to know what the "thing"
I saw was last nite at 8:30 p.m.

I saw a big bright yellow sphere
of light descend from the top of the
Sandia Mountains straight down to tree-
top level. It was very, very bright and
as it descended it got dimmer until it was
an orange then a red glow. At tree-
top level it was red, then it took off
in a straight line north towards Albuquerque.
Please answer and let me know what
it was. Thank you.

26 May 1967

Mrs. [REDACTED]
[REDACTED] 31
Los Lunas, New Mexico 87031

Dear Mrs. [REDACTED]

Captain Van Diver in our Safety Office sent me your letter in which you requested information and books on UFOs. I would first recommend consulting the public library and, if they are not able to satisfy your requirements, you might write to:

SAF-OIC
Washington, D.C. 20030

That agency, part of the Secretary of the Air Force's Office, is geared to answer specific questions and provide more information than we can.

In regard to your questions about helicopters, they can descend in a straight line, hover at a standstill and then take off in a straight line. As you can see in the attached photo, one of our Kirtland helicopters is at a standstill fighting a fire.

The search lights used on the night in question are a series of lights rather than one single light of the World War II searchlight variety. Thus, the lights would appear to be a glow rather than be a single beam. Dust would also make it glow. Helicopters when nearing the earth create large clouds of dust from the wind generated by their rotating propeller blades. Helicopters are also equipped with blinking red and white lights as well as red and green lights.

One of our helicopters should be in the Los Lunas/Valencia area next Thursday evening (1 June) and you might be able to compare what you saw earlier.

We in the Air Force are doing our best to answer UFO queries in an open and honest manner. We try to explain each sighting. Your sighting is an example of our efforts to investigate and determine what was sighted.

If we can be of more assistance, please write.

Yours truly,

JOHN W. DUEMMEL, Captain, USAF
Director of Information

1

Valencia, N. Mex.

Charles H. Van Dine Capt. U.S.A.F.
Chief of Safety.

Dear Sir:

I received your letter in which you state that the sighting I witnessed was a helicopter operating high-powered search lights, and that the atmosphere contained large amounts of blowing sand and dust.

I'm sorry to say this but I cannot possibly accept this as what I saw. In the first place the light was not a directed beam of light and it was a very large sphere of very very bright light that turned orange and red, getting dimmer as it descended. I'm sure I can tell the difference between a search light and a steady glow that does not blink or change colors, it just seemed to fade from bright yellow to orange to red as it stopped in mid-air. Can a helicopter descend in a straight line straight down, then hover at a standstill for a few seconds before taking off in a straight line through rather fast?

Is it possible that all

these sightings seem to want to be
 quieted so badly. For instance the
 sighting at Socorro. They had a plausible
 story from a man that was not
 merely someone who didn't know the
 difference between a searchlight and some-
 thing else. When I was 17 years old
 I saw three U.F.O.s but I feared
 ridicule so I kept it to myself. Out-
 side of my parents I told no one.

I assure you, I'm not the type of person
 who makes up tales to draw attention
 to myself. I'm an average housewife
 that stays to home. I've too much to
 keep me occupied, I have no time
 to run around telling tales of things
 I "thought" I saw.

I've read books by Major Kehoe
 and Frank Edwards and I'm convinced
 that there is something to these U.F.O.s.
 Please could you get me a list of the
 best books to read on this subject?
 Please let me hear from you.

Sincerely,

Mrs. ~~XXXXXXXXXXXXXXXXXXXX~~
