

FDG. ATIC REPORT () Incident #248

ATIC ID# _____ DATE OF INFO 10 Feb 49

AF ID# _____ LOCATION Layton, Ohio

TYPE OF PILOT AF Pilot from ATIC

DATE OF REPORT _____

TIME OF OBSERVING 2032 EST COLOR White with blue glow at bottom

SHAPE Round

SIZE Larger than star

ANGLE 90° to 100°

NO. IN GROUP 1

YARDAGE None

FLIGHTS SKETCHES

Fill out ATIC Form 3rd

(Jan 52)

SPEED 20°-30° in 5 sec. Normal

ALTITUDE 10° from 8,000 ft above ground

LENGTH OF THE OBJECT 5 Sec.

TYPE OF OBSERVATION Visual - Air

MANEUVERS Gradual descent

Remarks: Broke into two pieces.
Had long tail.

Astro(meteor)

Relative to Radar Sightings

- .. Re radars now operating on ground
 - a. Observations of direction, range, speed, altitude and size of target:
 - b. Did target execute any turns? If so, what angle (180°), etc, and what radius of turn. If radius of turn was not observable, how long did the target stay in the turn and what was its speed:
 - c. Note particularly any separation of distant target into several targets upon approach:
 - d. Was radar blip on cathode ray tube well defined and consistent with size of object; faint; fading, pulsating at regular rate?
 - e. Did radar echo signal disappear suddenly or gradually?
- 2. If airbourne, when object was sighted
 - a. Were there any radar indications or extra noise on radio circuits:
 - b. Give estimates of size, speed, maneuvers, etc.

WEATHER

- 1. Teletype sequences of local weather conditions.
- 2. Winds aloft reports

Page 4
Guide to Investigation

3. Local flight schedules of commercial, private and military aircraft flying in vicinity at the time.
(Check Canadian activity if close to border)
4. Possible releases of testing devices in vicinity sent aloft by Ordnance Navy, Air Force, Army, Weather Units, Research Organizations or any other:
5. If object contacted earth, obtain soil samples within and without depression or spot where object landed for purposes of making comparison of soils.
6. Obtain photographs (or original negatives) where available; if not, secure sketches of:
 - a. Object
 - b. Surrounding terrain where object was observed
 - c. Place where object contacted earth (if this happened)
 - d. Maneuvers
 - e. Formation (if more than two)
7. Secure signed statements.
8. Obtain fragments or physical evidence where possible.

G.I. INVESTIGATION

UNIDENTIFIED AERIAL OBJECTS

Incident No. 248

1. Date of Observation 10 Feb 49 Date of Interview 17 Feb
2. Exact time of observation (local) 2032
3. Place of Observation :
(Map Coordinates) 39° 56' N, 84° 11' W
4. Position of observer (air, car, bldg, location of - give details):
7900' hd 340° fr WNW 6 min. by turning back & checking
1nd 155 mph
5. What attracted attention to object: by other observer
6. Number of objects and sketch of formation or grouping: one divided into
two parts that disintegrated into
sparks & faded.
7. Apparent size (compare to known object, i. e., sun, moon, thumb or
fist at arms length):
like a shooting star but appears larger than
usual star seen.
8. Color of object: White blue glow on bottom
9. Shape (give graphic description - compare with known object):
none discernable rounded and
faded to red as it went out
10. Altitude (Angle of elevation above horizon - 0° at horizon, 90° overhead):
slightly above ac and descending slowly
10° at first sighting
11. Direction from observer (Angle clockwise from North):
5° rt. of observers at first nearly directly N
12. Distance from observer (Distance to town, bldg, etc., over which
object appeared to be): 1-2 mi apparently est.
13. Direction of flight of object (s): approx. 90-100°
14. Time in sight: 5 sec.
15. Speed (time to cover given angular distance):
W. 15 sec
16. Sound and odor:
none F

17. Trail (color, length, width, persistance, etc.)

5 times length of obj. tapering to pt.
some at all time very persistent

18. Luminosity (visible by reflection, incandescence, other - degree of
brilliance):

Incandescent very brilliant
like white flare

19. Projections (fins, wings, rods, antennae, canopies, etc.):

only light

20. Maneuvers (turns, climbs, dives, etc - sketch of flight path):

straight gradual descent to approx
9000'

21. Manner of disappearance: disintegrated

22. Effect on clouds: disappeared before reaching clouds

23. Additional information concerning object:

24. Weather conditions and light at time of sighting:

-18° C

very bright moon like
overcast clouds below broken overcast

Name and address of observer:

Roger S. Groseclose, Capt.

Occupation and hobbies:

Pilot MC1A X A

Comments of Interrogator relative to intelligence and character of observer
(Check neighbors, police dept., FBI records, employer, etc.):

1st Roy Adams, AIT

Did observer wear glasses, especially polaroid glasses at time of sighting,
or was object viewed through canopy, window, or other transparent material?

thru windshield no glasses

INCIDENT NO. 248

1. Date of Observation 10 Feb 49 Date of Interview 11 Feb 49
2. Exact time (local) 2032
3. Place of Observation North of Dayton, Ohio $39^{\circ} 56' N$ $84^{\circ} 11' W$
4. Position of observer from air at 7,900 feet; 340° heading: 155 MPH indicated
5. What attracted attention to object: - Other observer
6. Number of objects 1
7. Apparent size Larger than star
8. Color of object White, blue glow on bottom fading to orange before disintegration
9. Shape Mostly round
10. Altitude (slightly above 7,900 descending slowly) 10° at first sighting
11. Direction from observer 5° right of observer (North)
12. Distance from observer 1 - 2 miles estimated
13. Direction of flight of object(s) Between 90 and 100°
14. Time in sight 5 seconds
15. Speed 20° to 30° in 5 seconds
16. Sound and odor None
17. Trail Five times length of object tapering to point
18. Luminosity Incandescent - very brilliant like white flare
19. Projections None
20. Maneuvers Straight gradual descent to approximately 9,000 feet
21. Manner of disappearance Broke into two parts then disintegrated
22. Effect on clouds Disappeared before reaching clouds
23. Additional information concerning object
24. Weather conditions Very bright moonlight above overcast - overcast clouds below - 2000 to 3000 ft broken overcast in northwest
- 6
91-2100-15

Page 2

Incident: 218

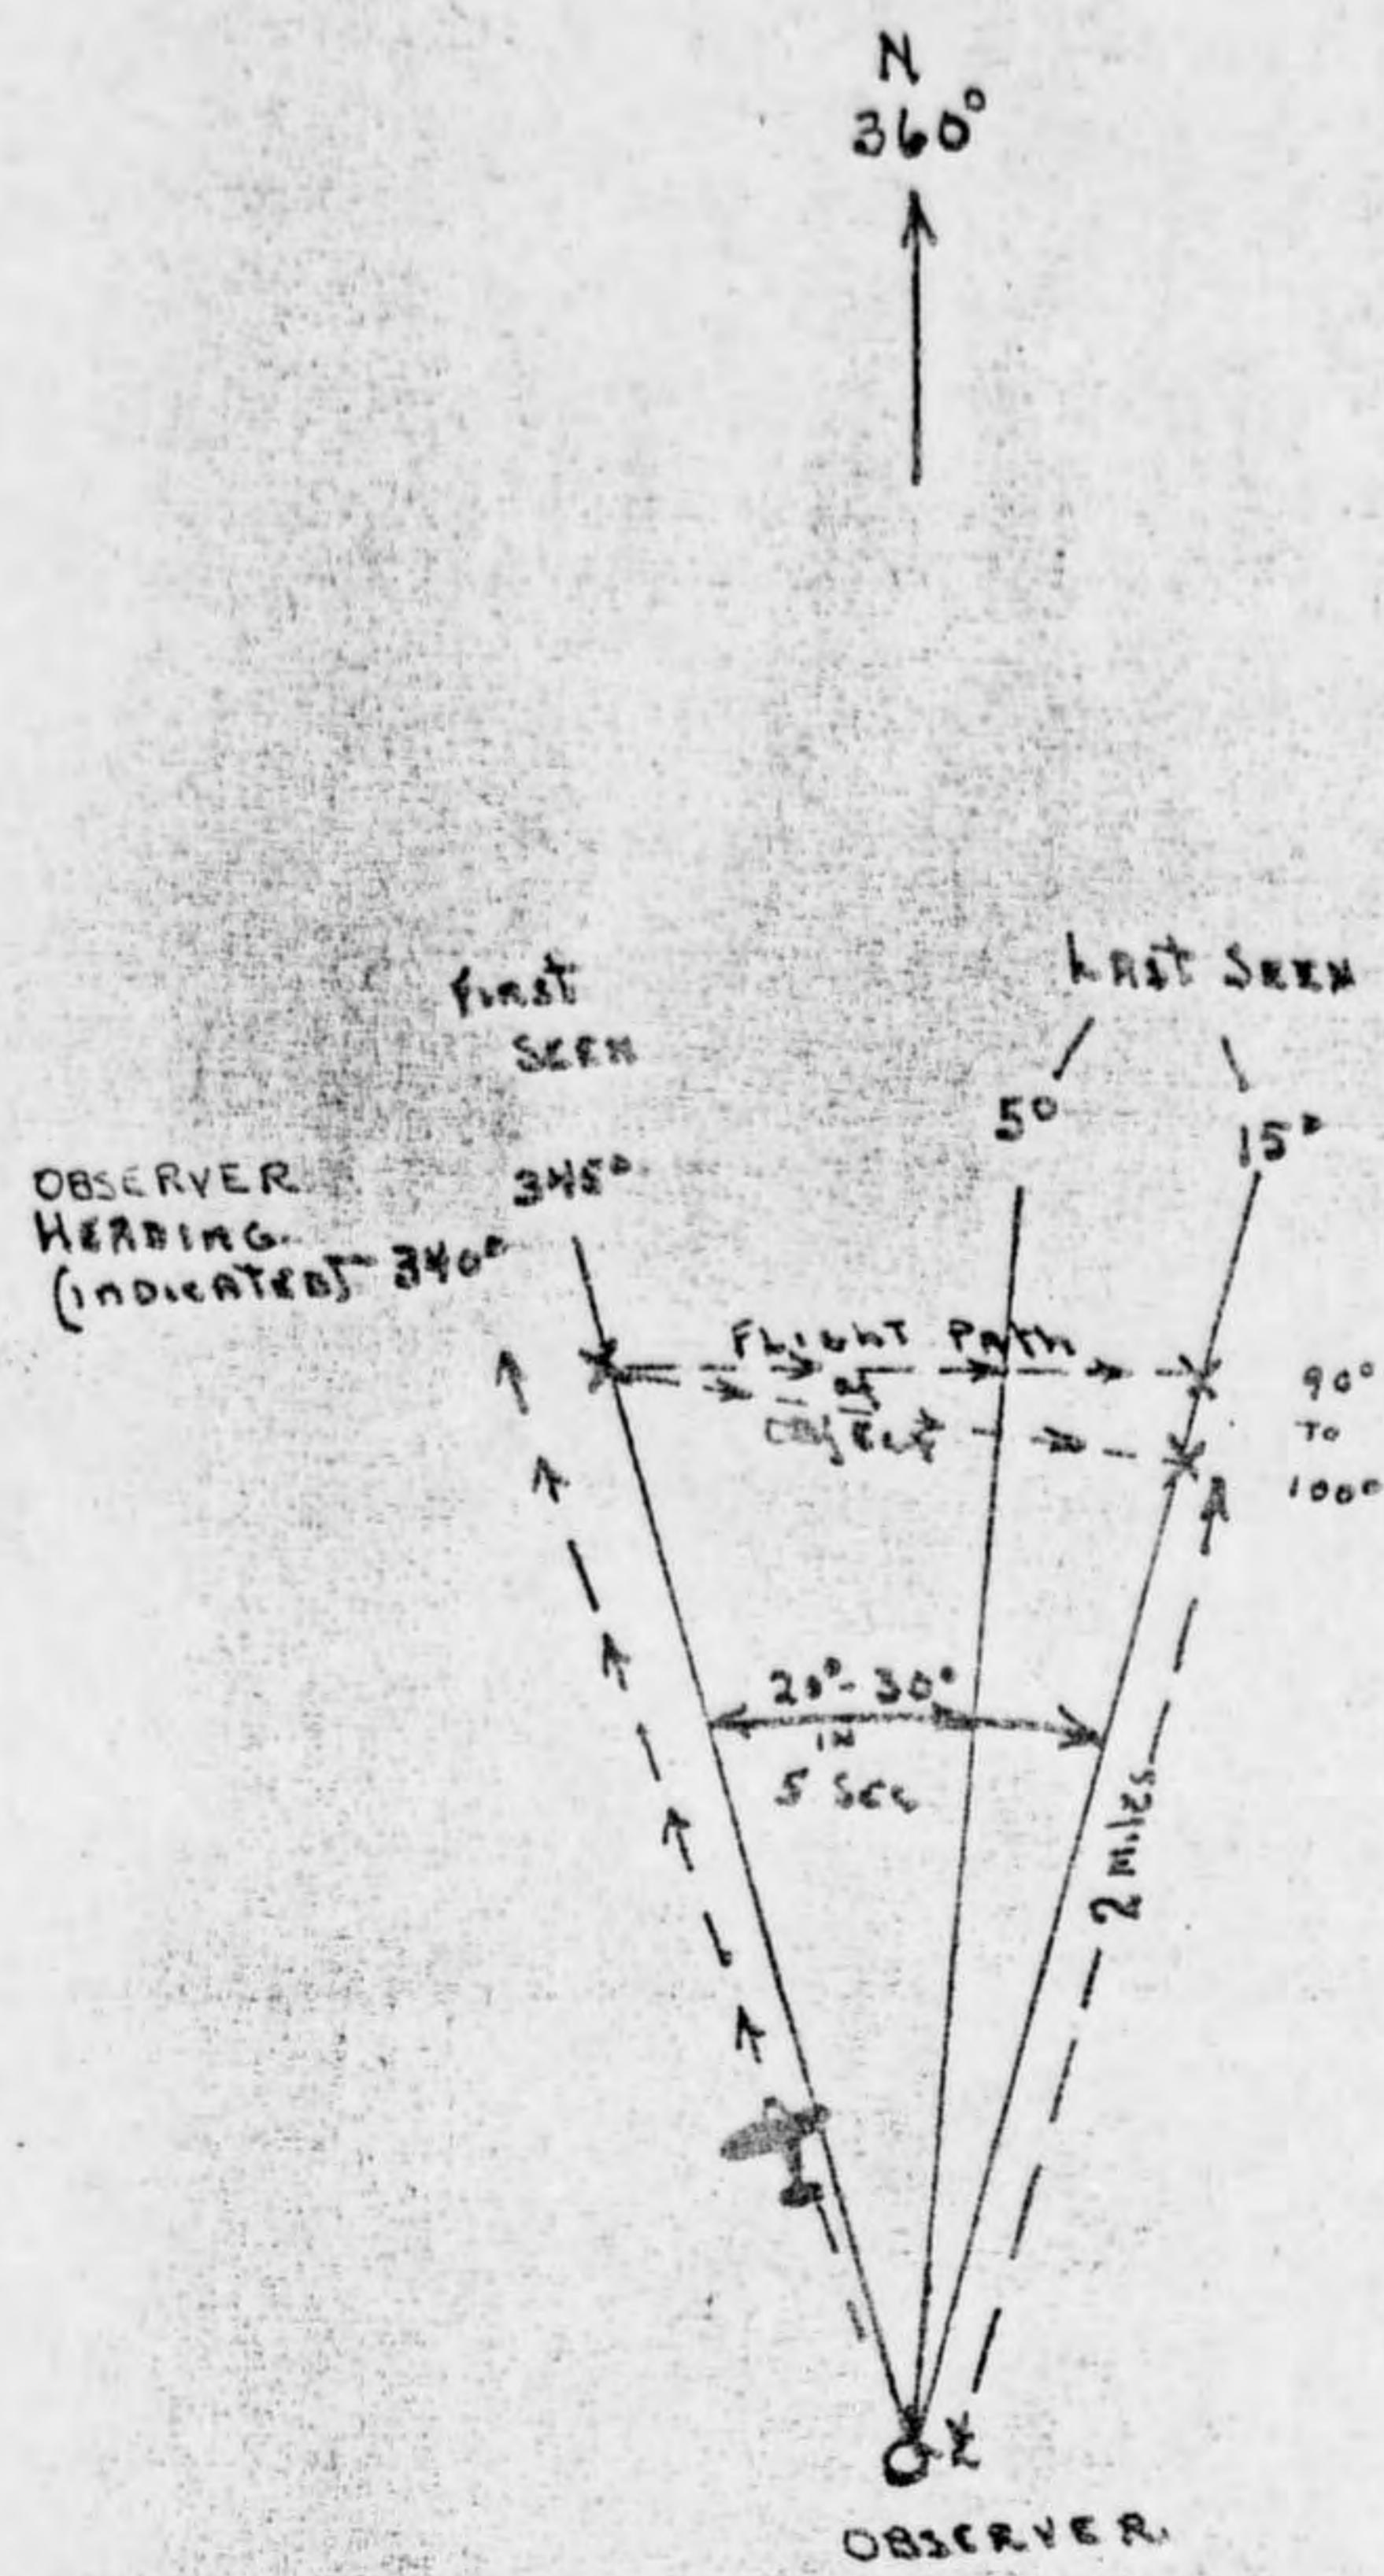

Name and address of observer: Capt Roger J. Groseclose, MCIA, WP AFB, Dayton, O

Occupation and hobbies: Capt USAF, Pilot

Comments of Interrogator relative to intelligence and character of
observer(s): Completely reliable

~~NARRATIVE SUMMARY:~~

NARRATIVE SUMMARY:

TRUE HEADING OF A/c WAS 360° APPROX.

OTHER HEADING & DIRECTIONS ARE RELATIVE.

LOCATION: $39^{\circ} 56' N$ -- $84^{\circ} 11' W$

Capt. Grosselose

INCIDENT 243

Name and address of observer: 1st Lt Ray W. Adams, USAF, WP AFB, Dayton, (

Occupation and hobbies: A. I. T. Student, Pilot

Comments of Interrogator relative to intelligence and character of
observer(s):

Completely reliable

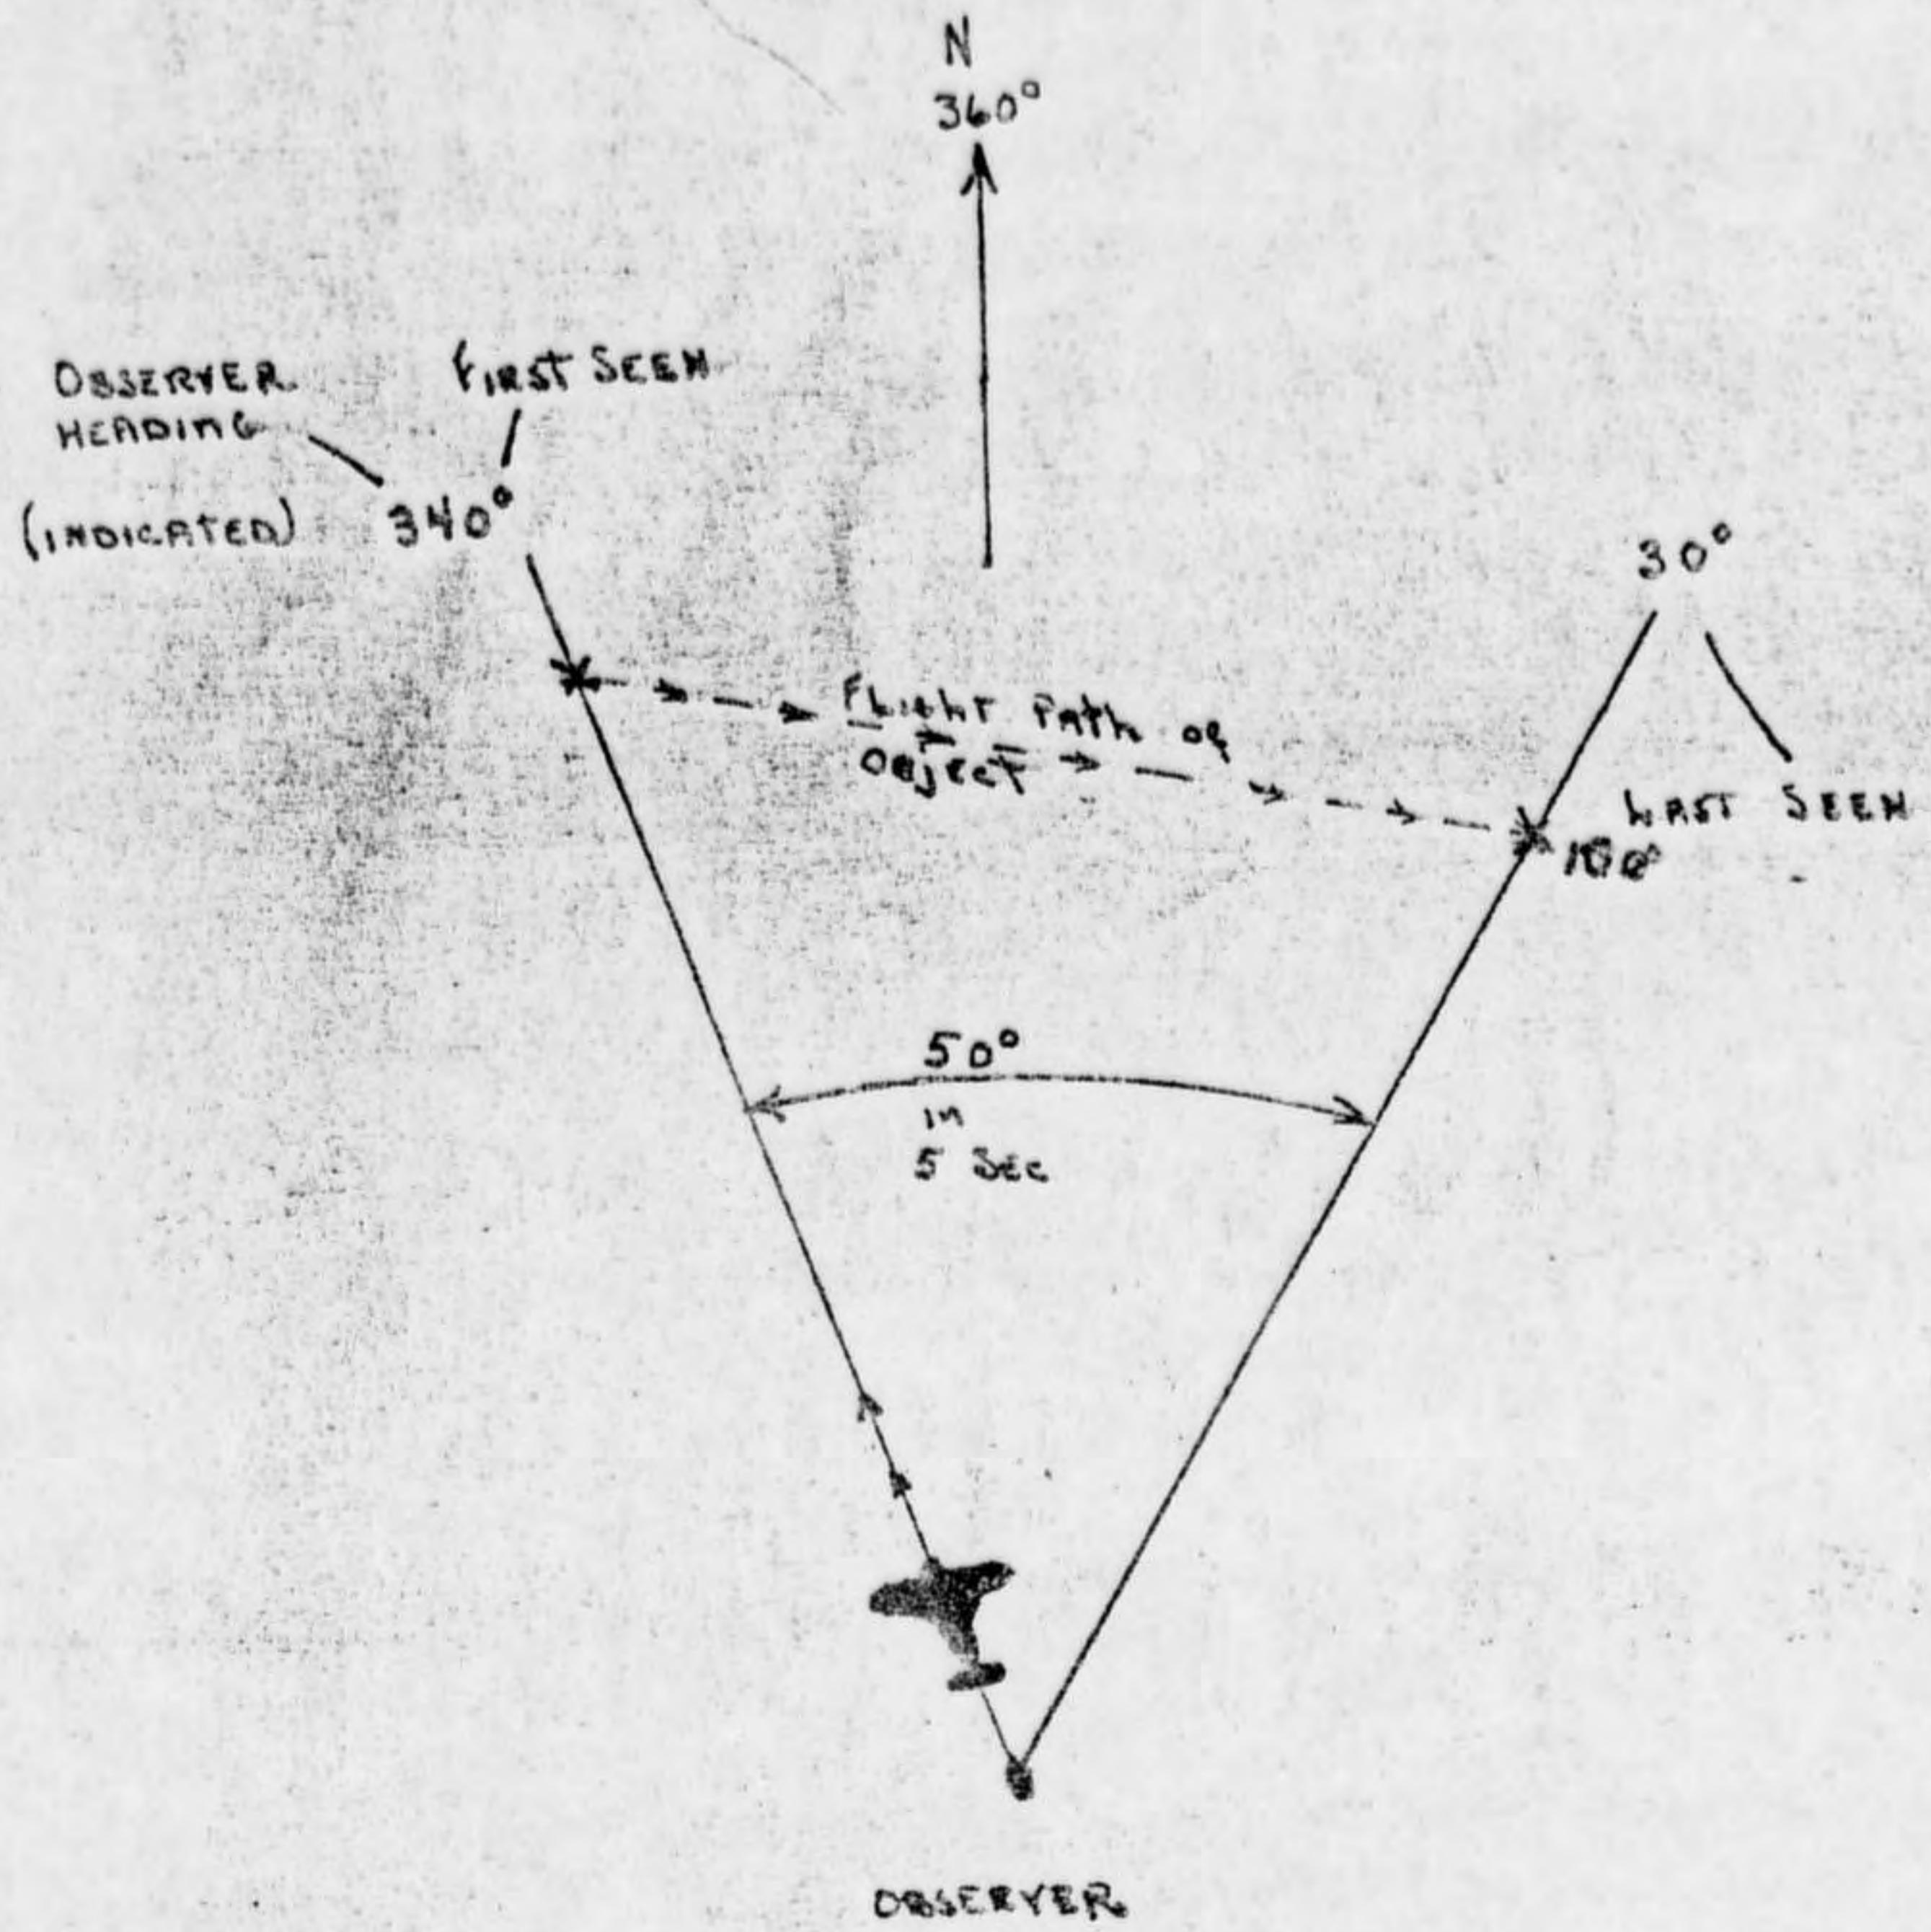

NARRATIVE SUMMARY:

INCIDENT NO.

243A

1. Date of Observation 19 Feb 49 Date of Interview 11 Feb 49
2. Exact time (local) 2032
3. Place of Observation , North of Dayton, Ohio 39° 56' N 84° 11' W
4. Position of observer Air 7,900 ft 340° Indicated heading; 155 MPH Indicated
5. What attracted attention to object : - Pinpoint which grew larger as it
Airspeed approached
6. Number of objects 1
7. Apparent size Size of golf ball on windshield at peak
8. Color of object Brilliant white, pale blue on lower part
9. Shape Ball of light with tail
10. Altitude Appeared 2 inches below top of windshield in level flight at
farthest distance above aircraft at disappearance but lower than when first
11. Direction from observer Directly in front of A/C traveling to seen
right
12. Distance from observer No estimate given
13. Direction of flight of object(s) 100° heading
14. Time in sight 5 seconds
15. Speed 50° in 5 seconds
16. Sound and odor None noticed
17. Trail Twice as long as body, directly connected, tapering, non-persistent
18. Luminosity Brilliant as arc welder (incandescent)
19. Projections None
20. Maneuvers Steady speed slight descent
21. Manner of disappearance Broke in two pieces, front piece disappeared
immediately. Back piece broke into clusters which shot ahead and faded
22. Effect on clouds None
23. Additional information concerning object : Seen through windshield
24. Weather conditions Good visibility - bright moon - object was
beyond line of overcast.

(over)

TRUE HEADING OF A/C WAS APPROX 360°

OTHER HEADING & DIRECTIONS ARE RELATIVE

Location: 39° 56' N. - 84° 11' W.

1st Lt. Roy W. ADAMS.

INCIDENT 2488

GOI - U. S. INVESTIGATION

UNIDENTIFIED AERIAL OBJECTS

Incident No. 248 a

1. Date of Observation 10 Feb Date of Interview 11 Feb
2. Exact time of observation (local) 2022
3. Place of Observation : 39° 56' N, 84° 11' W
(Map Coordinates)
4. Position of observer (air, car, bldg, location of - give details):
7900' ~~340°~~ 155 mph Ind.
1000' front top checked back to Dayton hills Springfield 7000'
5. What attracted attention to object:
I saw pinpoint which grew larger as approached
6. Number of objects and sketch of formation or grouping:
7. Apparent size (compare to known object, i. e., sun, moon, thumb or fist at arms length): size of golf ball on windshield
at largest
8. Color of object: brilliant white - pale blue on top
9. Shape (give graphic description - compare with known object):
ball of light - with tail
10. Altitude (Angle of elevation above horizon - 0° at horizon, 90° overhead):
est. two 1/2 below top of windshield in level flt.
at farthest distance from eye at disappearance
11. Direction from observer (Angle clockwise from North):
directly in front travelling to right
12. Distance from observer (Distance to town, bldg, etc., over which object appeared to be):
no dist.
13. Direction of flight of object (s): 100° heading
14. Time in sight: 5 sec.
15. Speed (time to cover given angular distance):
15°
16. Sound and odor:
none

17. Trail (color, length, width, persistance, etc.)
*tail twice as long as body directly connected
tapering. more persistent*
18. Luminosity (visible by reflection, incandescence, other - degree of
brilliant as arc welder / incandescent
19. Projections (fins, wings, rods, antennae, canopies, etc.):
none
20. Maneuvers (turns, climbs, dives, etc - sketch of flight path):
*steady direction
arc descent*
21. Manner of disappearance: *broke in two front piece
disappeared immediately back piece broke into pieces*
22. Effect on clouds: *which shot ahead and faded
back piece had projections to front which
was section that broke off*
23. Additional information concerning object:
24. Weather conditions and light at time of sighting:
*good vis. bright no haze or
object was beyond overcast*
- Name and address of observer:
- Occupation and hobbies: *BST Roy W. Adams A.I.T.*
pilot
- Comments of Interrogator relative to intelligence and character of observer
(Check neighbors, police dept., FBI records, employer, etc.):
Completely reliable
- Did observer wear glasses, especially polaroid glasses at time of sighting,
or was object viewed through canopy, window, or other transparent material?
Seen thru windshield
