1. At approximately 09:15, MST, 27 August 1952, T/Sgt Amadeo J. Sandoval AF-0961532 saw two unidentified, blue-white, brilliant, flying objects over Davis-Monthan Air Force Base, Tucson, Arizona. The objects were at different altitudes, traveling in a pendulous, erratic, motion at varying speeds at an unestimable altitude. The objects at first seemed to be traveling to the south but object #2 swung to the east just before it sped out of sight. He could give no estimate of the various speeds involved. A/IC Robert G Smith, AF-14369947 witnessed these two objects from the same place as T/Sgt Sandoval and relates the same story. Numerous people in Tucson reported witnessing similar objects.

1. The objects observed by T/Sgt Sandoval and A/LC Smith appeared to be of a metallic substance of a brilliant, blue-white color and round in shape. The size and altitude could not be judged but object #1 (see diagram) seemed to be about twice as high as object #2 with object #2 appearing to be of the size of a B-29 at about 10,000 feet of altitude. Object #1 was in fairly close proximity to the sun and was traveling in a general south direction at a slow rate of speed in an erratic, pendulous course. Object #2 was traveling in a general southeasterly direction but appeared to be traveling a little faster and the erratic course was more pronounced. This observation lasted for about 10 minutes and no sounds were heard at any time. Twice during the observation object #2 increased its speed and seemed to emit a "tail" or trailed an unknown substance, less dense in appearance than the object, white in color, with a complete absence of the blue coloring noted in the object. This tail or trail disappeared as the speed diminished. T/Sgt Sandoval and A/LC Smith state that there were no projections, such as flight surfaces on either object. Object #1 continued at a constant speed until it disappeared into the south. Object #2 seemed to hover for about six or seven minutes, then travel at a slow rate of speed in a southeasterly direction for about three to four minutes, then picked up speed and shot out of sight with the speed of a meteor in a due east direction. T/Sgt Sandoval took a picture of object #2 just as it picked up speed before disappearing. ✓

2. Time of Observation: 09:15 MST, 27 August 1952. This observation lasted for approximately 10 minutes.

3. Manner of Observation: Visual. T/Sgt Sandoval donned polaroid sun glasses during the observation and noted that the brilliance of the object was not decreased by the dark glass.

4. Location: 32° 09' 00" N / 110° 52' 00" W
Objects appeared in close proximity to the sun, 40 - 45° above the horizon and south of observers position.

5. Identifying Information on Observer and Witness:

A. T/Sgt Amadeo J. Sandoval, AF-6961532, of Headquarters Squadron Section 803rd Air Base Group, Davis-Monthan Air Force Base, Tucson, Arizona, has been in the Air Force for 12 years. He has 7 years of experience as a PIO photographer which is the position he presently holds. T/Sgt Sandoval seems to be a sincere, discreet person and is considered extremely reliable by his immediate supervisors. T/Sgt Sandoval has 4 years combat service and about 17 years photographic experience.

B. A/LC Robert G Smith AF-1436994 of Headquarters Squadron Section, 803rd Air Base Group, Davis-Monthan Air Force Base, has been in the Air Force for 17 months and is considered absolutely reliable by his supervisors.

6. Weather and Wind conditions at time of observation

A. 14,000 scattered, visibility 40 miles
Temperature 82°, Dew point 72°, wind west at 4 knots.

3. Physical Evidence:

A. Photographs of Object #2

- (1) Photo #1 is contact print
- (2) Photo #2 is enlargement

B. Photos were taken with a speed Graphic Camera at between f16 and f22, 1/100 of a second with a yellow #2 filter. Picture taken with camera in approximately vertical position.

9. Interception or Identification action taken: None

Comments of Originator:

1. Sandoval and Smith are very certain of what they saw. Each man's statements were clear and concise and in all phases agreed on what happened.

2. Numerous people in the city of Tucson saw similar objects at the same time.
